

## Systems - Restart procedures

**Restart and select another system (X-start)**[<-](#)[>-](#)**What happens with my current system?**

The current system will be stopped.

All system parameters and programs will be saved to an image file, so that the system state can be resumed later.

**Restart and select another system**

This section describes how to restart and select another system.

Action	Info
1 Make sure the power to the controller cabinet is switched on.	
2 On the <b>ABB</b> menu, tap <b>Restart</b> . The restart dialog is displayed.	
3 Tap <b>Advanced...</b> to select restart method. The select restart method dialog is displayed.
